Challenges?

- The SharePoint solution developed in-house involved too many steps to file an email.
- Searching was very slow so some staff kept PST files.
- The cost to improve and maintain the solution was prohibitive.

Results?

- Drag-and-drop simplicity of email filing resulted in broad adoption out of the gates.
- Provides a single team view of email for each project.
- Instant keyword search of email and attached PDF, CAD, and Microsoft® Office® files has been a big hit.
