

## CASE STUDY: MASCARO CONSTRUCTION COMPANY

### CHALLENGES:

- Eliminate the printing, duplication, handling, shipping and filing of paper construction administration documents.
- Push project information into the field without delay, as soon as it updates.
- Eliminate faxes and their poor quality.

### SOLUTION:

- Newforma ConstructEx web-based software for collaboration and project information management

### RESULTS:

- Reduces paper by 90%.
- Slashes RFI turnaround time by 50%.
- Maintains a record of what was sent to whom, when.
- Eliminates delays in getting ASIs into the field.
- Slashes the risk of tasks slipping through cracks or team members not receiving information.

## CASE STUDY: LILLIBRIDGE HEALTHCARE SERVICES

### CHALLENGES:

- Slash time spent processing paper construction administration documents.
- Spend more time at the job site answering questions and managing vendors.

### SOLUTION:

- Newforma ConstructEx web-based software for collaboration and project information management.

### RESULTS:

- All project documents are in one location online, where team members can access them with ease at any time.
- Project managers have more time to walk the site, visit with the contractor, review specifications, and make sure trades are scheduled efficiently.
- The search function makes it easy to retrieve reference documents, such as when a filed submittal clarifies a new RFI.

## WEBINAR INFO

# LEARN HOW TO REDUCE YOUR RFI & SUBMITTAL PROCESSING
