Workplace
High Performance Buildings
Mission Critical Facilities
Health
Science
Education

“We need to search quickly, get the information, get it onto the drawings and get it out of here. When I saw the presentation for Newforma Project Center, I thought, ‘This is what we’ve been looking for.’”

ABN AMRO Plaza; Chicago, Illinois

Challenges?

- Turn around small projects quickly, without errors.
- Resolve issues swiftly.
- Quickly find documents originally attached to emails.

Results?

- Newforma Search finds terms even if they exist in email attachments, external reference documents and ZIP files.
- Project managers are able to find emails resolving issues while the client is still on the phone.
- Functionality to compare drawings shows what’s changed between iterations of drawings and drawing sets.
