Ports, Marine, Waterfront
Transportation
Environmental Services
Offshore and Energy
Planning and Urban Design
Landscape Architecture and Urban Design

Buildings (Education, Aviation, Commercial, Industrial, Military)

“I recently had to pull up an old email to resolve a disagreement. I had an email from June 2007 that cleared up the confusion. And I found it while we were on the phone!”

Challenges?
• Project information was flooding in from team members in Panama, Mexico, Vietnam, and the United States.
• At only 25% complete, the project had generated more than 10,000 e-mails and 600 submittals.

Results?
• Newforma’s PIM solution has streamlined BergerABAM’s management of e-mail, submittals (whether outgoing or incoming), transmittals, RFIs, markups, and action items.
• Newforma Info Exchange frees the company from the shortcomings of sharing files via email or FTP.
• Functions to manage the project timeline, project team, project files, and record copies all contribute to a firmer, more solid information footing.
