

Newforma to Clearview

YOUR SINGLE SOURCE OF TRUTH FOR PROJECT PORTFOLIO

Eliminate need to create and update projects in Newforma Project Center

- New projects added to Clearview InFocus are automatically setup in Project Center. This completely eliminates any administrative work to manage project setup in Project Center.
- The project folder and appropriate subfolders are created on the file server. Complex systems for ensuring projects get setup correctly are no longer required.

Update projects, companies, contacts

- Changes to the project name, project manager or any other project information are automatically synced to the Project Center project. Projects are easy to find and manage with zero administrative overhead.
- Project related companies and contacts such as Clients and Vendors are also synced with Project Center. This ensures a single source of truth for all contact information.

BENEFITS FOR NEWFORMA USERS

- Eliminate administrative overhead
- Ensure projects are immediately ready to use

BENEFITS FOR CLEARVIEW USERS

- Standardize the source of project information
- Quickly access project files and communication
