PROJECT TYPES

Healthcare:
- Medical Office Buildings
- Hospitals
- Health Systems

“By cutting up to 40 percent from construction administration processing time, Newforma Project Cloud recaptures as many as 10 hours a week to be on the site, managing the project.”

Woman’s Hospital Medical Office Building; Baton Rouge, Louisiana; photo by Rick Pearson

Challenges?

- Slash time spent processing paper construction administration documents.
- Spend more time at the job site answering questions and managing vendors.

Results?

- All project documents are in one location online, where team members can access them with ease at any time.
- Project managers have more time to walk the site, visit with the contractor, review specifications, and make sure trades are scheduled efficiently.
- The search function makes it easy to retrieve reference documents, such as when a filed submittal clarifies a new RFI.
