

Procore Newforma

SAVE TIME, MONEY, EFFORT AND
REDUCE RISK BY INTEGRATING
SUBMITTAL AND RFI WORKFLOWS

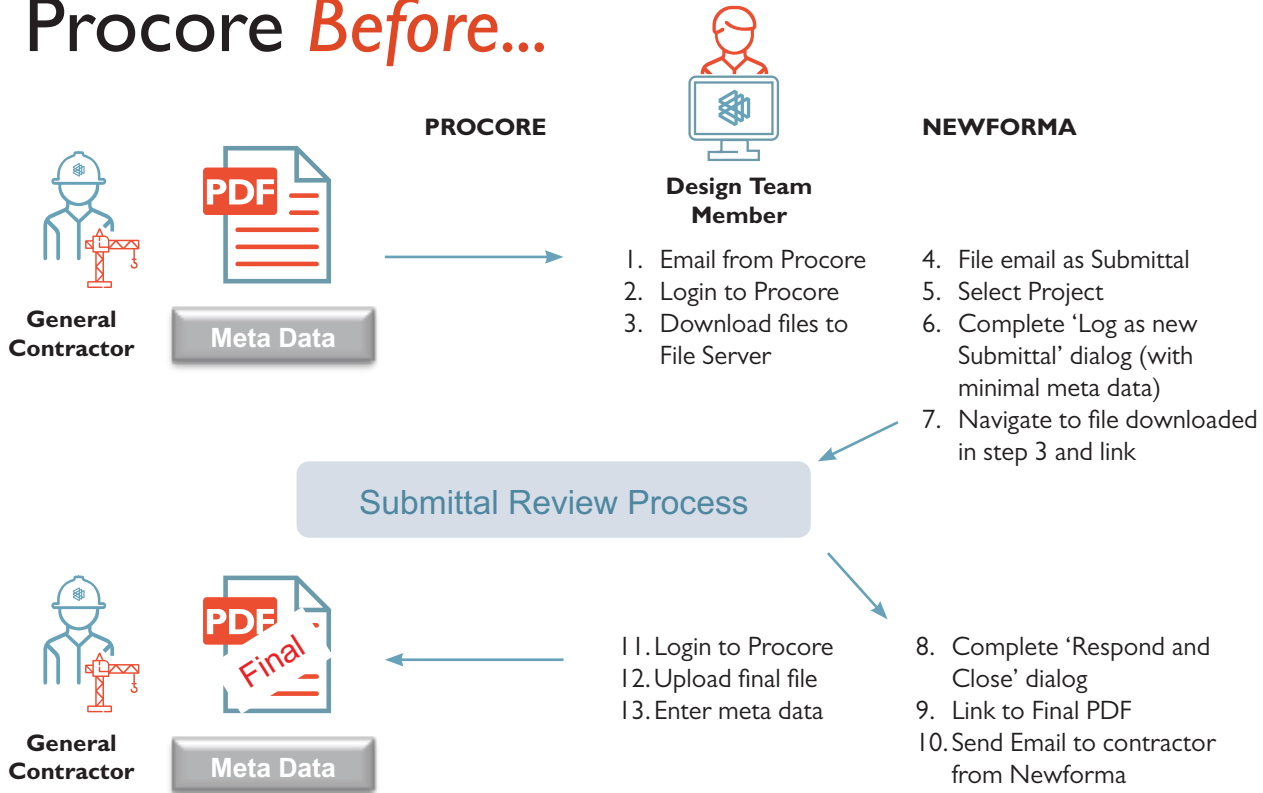

Newforma's Workflow Connector for Procore streamlines and simplifies construction contract administration by allowing the construction team and the design team to each work in their preferred software solution.

WHY DESIGN TEAMS LOVE THIS CONNECTOR

Are you tired of fighting at kick-off meetings about whose system will be used for managing Construction Administration on your projects? With this connector, manual double-entry is eliminated. RFIs and Submittals automatically flow effortlessly between Design and Contractor teams using Procore and Newforma Project Center.

- RFIs and Submittals automatically sync between Procore and Newforma, resulting in a complete project record.
- No need to learn a new system, or teach contractors how to use Info Exchange.
- Save time in construction with faster RFI/Submittal turnaround time.
- Accurate record keeping for construction meetings and project history.
- Design teams always retain access to RFI and submittal data when the project is archived.
