

YOUR JOB TITLE

FUNCTIONS AND OUTCOMES WHEN USING PROJECT CENTER

PROJECT ARCHITECT

PROJECT ENGINEER

MINIMIZE ADMIN WORK

SEARCH AND FIND ALL PROJECT DATA

AVOID BLAME WHEN INNOCENT

EMAIL MANAGEMENT

MOBILE TOOLS WITH INTERFACES TO SUPPORT THE WAY YOU WORK

TRACK AND LOG CRITICAL ACTIVITIES

OUR CUSTOMERS, YOUR PEERS

*Because it is a large project and there are so many players on the team, everything we would do for a smaller project is exponentially more difficult because there is a lot of back-and-forth we have to deal with. Projects used to be 10GB, we are working on a project that is already a terabyte and we are only heading into the project. Keeping all that information searchable and findable is kind of a big deal. A challenge of the construction administration process on a fast-moving construction project is to make sure you can quickly receive the issues and communicate with the consultants to document an issue and then be able to get that back to the contractor in a timely fashion. In the past, answering an RFI could have taken as much as one week. We had gigantic spreadsheets with a lot of columns and rows for every submittal and RFI, tracking every time that piece of information moved; it was very labor intensive. A subcontractor could be waiting on that information and could be delayed. Newforma makes that information usable and findable in short order.*
